

Portable UV-C Sanitizer

We will overcome COVID-19 Pandemic only with effective Sanitization & with social distancing. This time shall pass.

*Now the majority of our time in a day is utilized for sanitizing ourselves, workspace and living space but not much care is taken about pocket items like **Mobiles, Cash, Masks, Earphones, Eyewear, Keys, Wallets** and other handheld objects. As these are majorly used by hands and non-sanitization of these items would be harmful.*

*The **UV-C technology** is most effective sanitization proven to be **99.99%** effective in killing bacteria and **Virus like Coronavirus***

*The **Portable UV-C sanitizer** is here to resolve this as it is designed in such a way that the handheld objects like Mobiles, Earphones, Keys, Wallets , Eyewear, Gadgets, and other frequently used handhelds can be instantly sanitized within 10-20 minutes as UV-C Radiation is known to kill Viruses and bacterias.*

Specifications:

Power Supply: 230V AC

Dimensions:

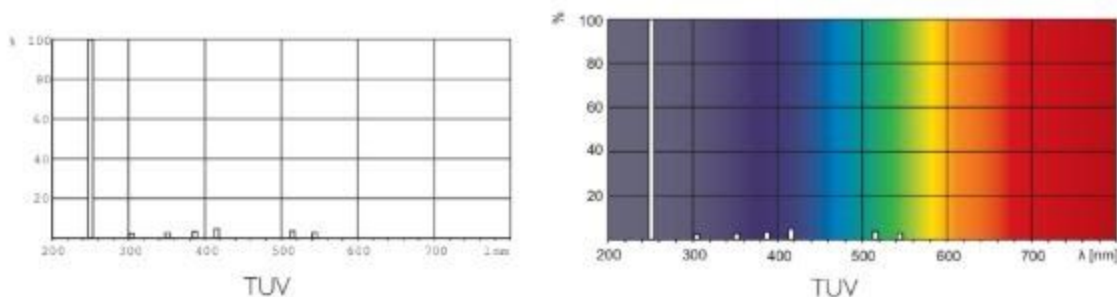

UV-C light: Radiation 0.9 W

Lamp Watts 4 W

Lamp Voltage 29 V

Lamp Current 0.17 A

Photometric data

How to Use:

1. Place your Cash, Mobile, Wallet, Keys, Masks gadgets, or other objects inside the UV-C Sanitizer.
2. Close the Sanitizer properly.
3. Turn-on the sanitizer & wait for 10-20 minutes.
4. Turn-off the sanitizer and take out the objects which have been sanitized.

Do's & Don'ts':

1. Sanitize the items for adequate time only (suggested 10-20mins) then turn off the UV-C light.
2. 230v power supply, keep away from children.
3. UVC light, longer exposure to human eye skin is harmful. make sure the door is closed before turning on the UV-C light.
